

Pin the pea on the bed.

Wearing a blindfold can you place the pea on mattress number 1.

Remove your blindfold and see what mattress number your pea is placed on. Have a go at counting how many mattresses nearer you needed to be. e.g. if your pea is on mattress 3 you would be 2 mattresses away etc.

You can print off and use the numbered mattresses and pea on the page below or create your own pile of mattresses using pens and paper or strips of assorted coloured paper stuck onto a large piece of paper.

Solve the maths clues to place the pea.

Can you work out which mattress to place the pea by following these maths clues?

There are 12 in total to complete. Can you think of your own maths clues to give to another family member?

“Place the pea on the mattress that is...”
