Amazing facts

Pufferfish have a unique way of keeping themselves safe.

Do you know what it is?

Jellyfish have been around for a very long time.

Do you know just how long?

Crabs have a very unusual way of walking.

Do you know what it is?

If they think that another animal wants to eat them, pufferfish quickly fill their tummies with lots of water and become a round, hard ball!

Jellyfish have been around for millions of years. There were jellyfish on Earth even before the dinosaurs existed!

Crabs have ten legs and walk sideways. Two of their ten legs have large claws on the end that crabs use for grabbing things.
