

Sort the statements

The statements below describe changes that can happen to different materials. Discuss them with a partner and then draw a line to **match each one to the correct process**. The first one has been done for you.

Write an 'R' or an 'I' next to each statement to show if you think the change is reversible or irreversible.

Statement about change
Water in a puddle when the Sun comes out
Chocolate left close to a warm heater
Window misting up in the kitchen
Sugar stirred into hot coffee
Water in the kettle with steam rising
Fruit drinks in moulds left in the freezer
Washing that has been pegged out on a windy day
Using materials in a funnel to clean dirty water

Process
Filtering
Freezing
Boiling
Drying
Dissolving
Melting
Evaporating
Condensing
